Keukenhof trip 2016

Mechanical planter in action in Kildare

Local school fundraising with bulb planting

Local school fundraising with bulb planting

Beechill Bulbs

New catalogue 2017

We hope you enjoy our new catalogue for the coming autumn season 2017. Since 2008 we have constantly made step changes in the way we present to you the selection that we can offer. This new catalogue is one of the most significant changes to date.

In 2016 our Keukenhof tour had the highest attendance to date with almost 50 people turning up. It is a wonderful day of learning and sightseeing. The grower tour is informative of the science and effort that goes into production and breeding of bulb varieties, while the garden tour never disappoints. We had an extra treat last year, when the head designer of the gardens gave us a quick talk at the entrance beforehand.

The mechanical planting service has really established itself among our clients as the most cost effective means of large scale planting. In addition to the planting areas, there are also the longer term benefits of reduced maintenance of said areas & perennial displays for up to 10 years before replanting required.

Beechill Bulbs are an active participant in our local community and as such, to help with primary fund raising, we donated bulbs and aided a bulb planting and potting project with Charleville N.S. in Tullamore. Each child in the school got a chance to get their hands dirty, and did some potting of hyacinth, muscari and narcissus. These pots will be sold by the children to raise funds for essential materials at their Easter fair.

As always we've got the best selection and premixed colour combinations for your needs. You will also find a very useful "Characteristics table" and alphabetical assortment index at the rear of the catalogue - for easy reference - but don't let this stop you from browsing at your leisure...

We're at your disposal for advice and guidance, and are available for site visits, please call if you'd like to make an appointment. We look forward to helping you over the coming months.

Kind regards

Damian McHugh & Janet Wallace

Lose yourself in the garden...

What Beechill stands for:

Core values

We live and breath our core values, as they define everything that follows. Without these fundamentals, we couldn't stand apart from the crowd. These values are:

- True Variety
- Top size bulbs
- Total quality control.

Dynamism

Beechill Bulbs are a young family business with a dynamic, innovative approach to the Irish landscape marketplace.

We provide a full field to flower service from colour matching, variety selection, layout design, site suitability, tailored logistics and planting.

We do our utmost to ensure that you the customer get the quality service and supply to ensure the maximum return on your investment.

Enthusiasm

Beechill Bulbs have the privilege of loving what we do. There is no simpler or greater joy than choosing from our broad selection and applying this to a dull or tired landscape scene. We try to impart this enthusiasm to our customers everyday so that you too can realise the potential contained in a simple bulb.

Customer focus

A happy customer is a repeat customer - for you. We make it our mission to ensure that your service is only enhanced by using us as your preferred bulb supplier. We do this through targeted logistics, site visits - before, during & after (as required), and advice and guidance on variety selection specific to your customers needs.

Explanation of symbols used in this catalogue

	Flowering period (months)		Humus rich location
	Height		Calcareous location
	Naturalising bulbs		Moist location
	Bulbs per m2		Bulbs suitable for pots
	Mowing period (months)		Organic flower bulbs
	Sunny location		Bulbs/mixtures attracting butterflies
	Semi shade		Bulbs/mixtures attracting bees
	Shady location		Fragrant flowers

Selection of new varieties and mixtures 2017/2018

How we have divided our products?

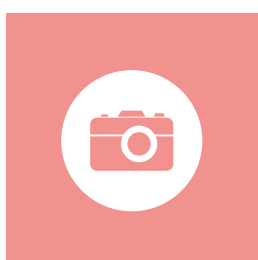

Verges and grass areas

p. 10 - 31

Maintenance-friendly bulbs for roadsides and grass areas

Are you looking for easy manageable mixtures which will come back year upon year? Simply look in the section 'Verges and Grass Areas'. Here you will also find the bee and butterfly mixtures. Some of our mixtures just flower in the early Spring, whilst others start early and flower until the end of June! Depending on your mowing regime, you can choose the most suitable mixtures.

Eye-catchers

p. 32 - 51

Bulbs for special places in public space

Are you looking for a striking bulb mixture for a special location, to celebrate a specific event or to emphasise an important location? Visit the category 'Eye-catchers'! These mixtures are also very suitable for containers and roundabouts. We have selected them by colour, height and flowering time.

Parks

p. 52 - 59

Naturalising and low-maintenance bulbs for woodland areas

Naturalising bulbs, many of them being native varieties, can be found in the 'Parks' section. Our naturalising bulbs are all nursery grown and not collected from the wild! In general, they require minimal maintenance and many of them will grow in (semi-) shady locations.

Gardens

p. 60 - 63

Bulbs to combine with perennial plants

The use of perennials and grasses has made a huge growth in recent years. Both in gardens and in public green they are becoming increasingly common. Therefore, we have a range of flower bulbs that are suitable for planting between perennials and grasses. Some examples can be found in the chapter 'Gardens'.

Inspiration

p. 64 - 67

Bulbs for various applications

JUB, in its long history, has realised many special projects. In the chapter 'Inspiration' we showcase some of our own projects, but also many other applications of bulbs. Get inspired to create your own unique combinations!

Assortment

p. 68 -105

Bulbs in various product groups

The entire JUB range can be found in the chapter 'Assortment'. The bulbs are organised according to information such as flowering time, height and bulbs per m2.

Organic bulbs

p. 106 - 111

Verified and certified

We obtain our organic bulbs from reliable organic growers, who do everything possible to grow their bulbs as organically and sustainably as possible. These varieties also provide a great contribution to the welfare of bees, butterflies and other insects (biodiversity).

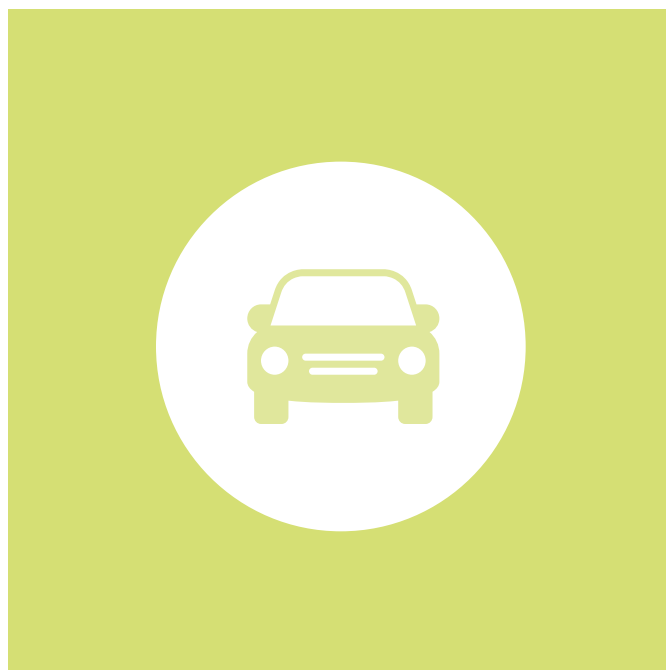

Practical tips and contact

p. 112 -123

Planting methods, fertilisation and growing location

25 years ago, JUB Holland developed a planting machine that can plant bulbs in a simple manner in existing grass areas and roadsides. Mechanical planting, in addition to information on the hand planting of bulbs and fertiliser and mowing policies, can be found in this chapter. You will also find a handy list in which each variety is mentioned with its correct growing location, specific features, durability, etc.

Verges and grass areas

Maintenance-friendly bulbs for roadsides and grass areas

Are you looking for easy manageable mixtures which will come back year upon year? Simply look in the section 'Verges and Grass Areas'. Here you will also find the bee and butterfly mixtures. Some of our mixtures just flower in the early Spring, whilst others start early and flower until the end of June! Depending on your mowing regime, you can choose the most suitable mixtures.

Biodiversity in verges and grass areas

What is biodiversity?

Biodiversity is a term we use to describe the richness of nature. It is about the great variety of animals, plants, habitats and genes. By interaction with environmental factors, biodiversity creates ecosystems in which organisms can live, for example humans. The habitats of bees and butterflies have become increasingly smaller and are also increasingly further apart. Floral roadsides, gardens and public green spaces can constitute an important link between these habitats.

Cooperation with the Beekeepers Association and the Butterfly Foundation

Organisations such as the British Beekeepers Association (BBKA), as well as its Dutch counterpart (NBV), and the Dutch Butterfly Foundation, are committed to improving the living conditions of bees and butterflies. Together with these organisations, we have developed special mixtures which are bee and butterfly friendly.

Bulbs for bees

The bulbs which we use in our bee mixtures all belong in the top 10. The botanical forms of all bulbs mentioned below are good for bees. "Bees" include both honey bees and wild bees. The mentioned varieties are examples of the tested species. The nectar and pollen value depends on various conditions such as weather, location, etc.

In the two columns, the values are given from 1 (moderate but useful) to 5 (very good).

	Nectar	Pollen
Allium sphaerocephalon, moly, giganteum	5	5
Crocus tommasinianus, vernus, 'Ruby Giant'	5	5
Chionodoxa luciliae, sardensis	3	3
Scilla bifolia and siberica	3	3
Muscari armeniacum and the 'aucheri varieties'	3	3
Galanthus nivalis	3	3
Hyacinthoides non-scripta	3	3
Eranthis hyemalis	3	3
Tulipa tarda, sylvestris	2	2
Anemone blanda and nemorosa	1	2
Ornithogalum umbellatum	1	1
Leucojum aestivum	1	1

Mixtures for verges, long flowering

Butterfly Mixture Alkmaar (in 2 flowering periods)

Butterflies are an important link in the food chain and furthermore pollinate flowers when they visit them to suck up the nectar. Butterflies have high standards for their habitat and will only appear in places where the conditions are right. By planting this special mixture butterflies are attracted in late Spring.

FLOWERING PERIOD 1, April - June

FLOWERING PERIOD 2, June - July

Mixture Volendam (in 2 flowering periods)

Mixture Volendam is very suitable for road verges with rough vegetation, with its early and late yellow daffodils, followed by alliums and camassias as an extra surprise.

FLOWERING PERIOD 1, February - April

FLOWERING PERIOD 2, May - June

Mixtures for verges, long flowering

Mixture Eindhoven (in 2 flowering periods)

This mixture is especially designed for road verges with rough vegetation. The flowering period starts in February with yellow daffodils, followed by fragrant narcissi in late-April. In May/June the alliums deliver a purple finish to the tall grass. Mowing can be done straight after the longest day in June.

FLOWERING PERIOD 1, February - April

FLOWERING PERIOD 2, May - June

Mixture Floriade (in 3 flowering periods)

This mixture was a great success at the main entrance of Floriade 2012 in Venlo in the Netherlands. From early Spring until the summer you will enjoy the great diversity of flowers in this mixture.

FLOWERING PERIOD 1, February - March

FLOWERING PERIOD 2, March - April

FLOWERING PERIOD 3, May - June

Mixtures for verges, long flowering

Mixture Brighton (in 3 flowering periods) 

Three different colours in one mixture. Yellow narcissi start off the show in March, followed by white narcissi and finishing with camassias in various shades of blue.

3 - 6

15-70 cm

100 p/m²

7 >

Bee Mixture Breda (in 2 flowering periods)

FLOWERING PERIOD 1, February - March

A bee attracting mixture in two phases. In February-March a flood of yellow and soft lilac specie crocuses, followed in March-April by a colourful mixture of specie tulips, muscaries and anemones.

FLOWERING PERIOD 3, March - April

Mixtures for verges and grass areas

Mixture Venlo

Create a colour sensation in roadsides and grass areas with this intriguing mixture! Impressive blooms on tall, sturdy stems start to flower in late-Spring. Flower heads of light and deep purple, along with creamy white, last for weeks, followed by the decorative seed heads.

5 - 6

80-90 cm

60 p/m²

7 >

Mixture Leiden

A beautiful mixture of many miscellaneous bulbs. A perfect naturalising mixture for woodland areas.

2 - 5

10-25 cm

300 p/m²

7 >

Mixture Middelburg

This mixture of botanical narcissi offers a beautiful variation of colour, shape and flowering time. It even includes some deliciously scented varieties.

Mixture Ede (in 2 flowering periods)

A surprisingly simple mixture with two colour periods. A bright yellow start in March, followed by pure white in April-May.

FLOWERING PERIOD 1, March - April

FLOWERING PERIOD 2, April - May

Mixtures for verges and grass areas

Mixture Amsterdam

A well-balanced mixture of many types of large flowering daffodils in different forms, colours and shapes.

Mixture Apeldoorn

A colourful mixture of botanical narcissi, with a contrasting addition of two tulip varieties.

Mixture Arnhem

Floral fireworks based on three months of yellow daffodils, contrasted by various red tulips.

Mixture Amstelveen

This combination of chionodoxa (Glory of the Snow) and botanical narcissi ensures years of flowering.

Mixture Rotterdam

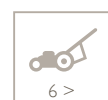

A beautiful mixture of yellow narcissi and daffodils with an extended flowering period. It includes early small narcissi and the taller daffodils will flower until the end of April.

Mixture Zwolle

This mixture in pure white is an elegant combination of white crocuses, white narcissi and white tulips.

Mixtures for verges and grass areas

Mixture Leerdam

Varied mixture of early crocuses, followed by muscaries, various specie tulips and white narcissi.

2 - 4

10-25 cm

330 p/m²

6 >

Mixture Veenendaal (in 2 flowering periods)

FLOWERING PERIOD I, February - March

A bee attracting mixture in two phases. In February-March the rich flowering Crocus Ruby Giant, followed in March-April by a blue-red mixture of specie tulips and muscaries.

2 - 4

10-25 cm

350 p/m²

6 >

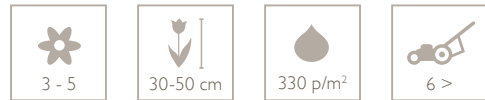

FLOWERING PERIOD 2, March - April

Mixture Lelystad

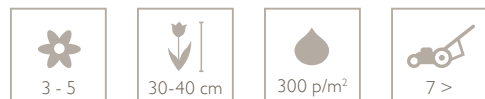

A nice mixture of anemones, botanical narcissi, botanical tulips and muscari.

Mixture Houten

A natural mixture of early crocuses, followed by various specie tulips, narcissi, muscaries and snakes head fritillaries.

Mixtures for verges and grass areas

Mixture Antwerpen

An early flowering mixture in pastels, with specie crocuses, snowdrops and scillas.

Mixture Bussum

Bees and bumblebees are very dependent on bulbs in the early Spring. Especially crocuses and anemones are frequently visited for their nectar. Our special mixture will attract bees and bumblebees during a long period!

Mixture Eikenhorst

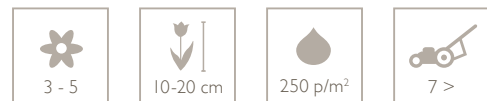

This mixture of blues and lilacs, flowers early in the Spring. It is a combination of various miscellaneous bulbs and specie tulips.

Mixture Huizen

A very natural mixture of good naturalisers. Corydalis, scillas and chionodoxa form a fascinating colour combination together.

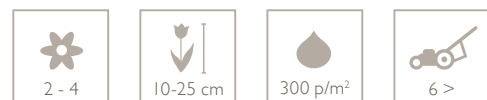

Mixture Tynaarlo (in 2 flowering periods)

FLOWERING PERIOD 1, February - March

A mixture with a wide variety of bulb types. Crocuses, chionodoxas, narcissi, puschkinia and specie tulips.

FLOWERING PERIOD 2, March - April

Mixtures for verges and grass areas

Mixture Nijmegen (in 2 flowering periods)

FL. PERIOD 1, Febr. - March

FL. PERIOD 2, Oct. - Nov.

A truly special combination of Autumn flowering crocuses and Spring flowering crocuses, which surprises you twice per year!

Mixture Nieuwegein

A most attractive early flowering mixture of Narcissus Tête-à-Tête and scillas.

2 - 4

10-25 cm

200 p/m²

5 >

Mixture Utrecht

This early flowering mixture of blue and white chionodoxas (Glory of the Snow) is excellent for naturalising. This combination of blues and whites results in a sparkling Spring show.

Mixture Tilburg (in 2 flowering periods)

FLOWERING PERIOD 1, February - March

A remarkable mixture of specie crocuses, followed by anemone blanda, clusiana tulips and muscaries.

FLOWERING PERIOD 2, April - May

Mixtures for verges and grass areas

Mixture Haarlem

Large flowering Dutch crocuses in shades of blue and white are very suitable for early perennial flowering in lawns and other grass areas.

Mixture Maastricht

A nice and very colourful mixture of specie and large flowering Dutch crocuses. Combining these two types results in an extra-long flowering time.

Mixture Voorschoten

A surprising Spring combination of muscaries, anemone blanda and chionodoxas.

Mixture Lisse

This stunning mixture of specie crocuses guarantees an abundant colour effect in the very early Spring.

Mixture Sneek

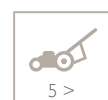

A nice colour combination of various large flowering Dutch crocuses.

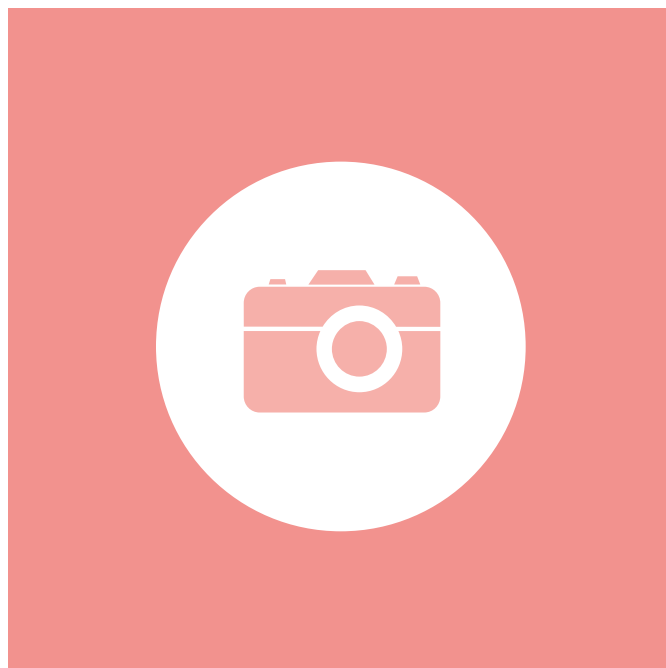

Mixture Noordwijk

An early flowering mixture of large flowering Dutch crocuses in yellow, blue, white and purple.

Gardens

Bulbs to combine with perennial plants

The use of perennials and grasses has made a huge growth in recent years. Both in gardens and in public green they are becoming increasingly common. Therefore, we have a range of flower bulbs that are suitable for planting between perennials and grasses. Some examples can be found in the chapter 'Gardens'.

Gardens

Perennials and flower bulbs

Perennial borders are often quite bare in the early Spring. To enjoy these borders over a longer period of time, you could plant bulbs which will flower in March, April and May. It is important to bear in mind that some perennials will also start to grow early in the Spring, and to choose the right bulbs to achieve a harmonious picture. As an added bonus the plants will cover up the withering foliage of the bulbs after flowering.

Inspiration

Bulbs for various applications

JUB, in its long history, has realised many special projects. In the chapter 'Inspiration' we showcase some of our own projects, but also many other applications of bulbs. Get inspired to create your own unique combinations!

Inspiration

Flower bulbs in public parks

Public parks are popular and important spaces in cities. Flower bulbs in these parks play an important role in the 'Spring feeling' of visitors. There are many possibilities with regard to the range. We are happy to recommend the varieties which are most suitable for your park.

Pots and containers

Flowers in pots and containers have become an essential part of the urban environment. They give that extra embellishment. The pots may be filled with many types of bulbs. Due to "wind resistance", we advise the use of low-growing Spring flowers: low-growing tulips, small flowering daffodils, hyacinths and miscellaneous bulbs.

Flower bulbs in zoos

Every Spring a zoo can be a wonderful explosion of colour. It is not only the (young) animals that attract visitors. Tulips and other spring flowering bulbs can be a welcome addition to the visitor experience. Especially at the beginning of the season when there are few flowering trees and perennials.

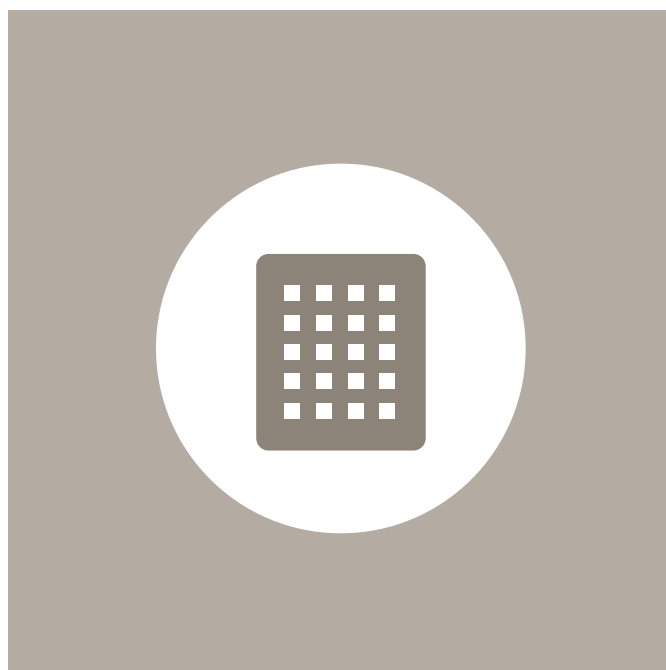

Special projects with bulbs

Bulbs can be used in many creative ways. Besides the usual applications in flower beds and pots, they can also be used to make special (company) logos or the so-called 'Smiley' with daffodils on a slope. Small bulbs such as crocus, chionodoxa, scilla and botanical daffodils can be applied to roof- and vertical gardens. Bulbs can also be used to capture special occasions such as commemorations of historical events.

Practical tips

Planting methods, feeding and planting location

25 years ago, JUB Holland developed a planting machine that can plant bulbs in existing lawns and roadsides, in a simple manner. In this chapter you can find information about mechanical as well as manual planting and feeding and mowing policies. You will also find a handy list in which each variety is shown with the recommended location, specific features, durability etc.

Mechanical planting

Mechanical planting of flower bulbs

Our special planting machine is ideal for planting large quantities of bulbs in existing grass, along roadsides, in lawns, roundabouts etc. By planting the bulbs with our machine you will achieve a major reduction in labour costs.

The machine is a combination of planter and (mini) tractor. A large container holds the bulbs, whilst at the bottom two belts deliver the bulbs to the 'plant feet'. Two vertical rotating knives open the turf just before the plant feet. The feet 'dive' into the ground and open up the turf, at which point the belts release the bulbs which fall into the soil and are then covered. The machine also puts the turf back in position, followed by a roller.

JUB planting machine

Filling the machine with bulbs

Turf gets opened up

Bulb planting

Roller puts turf back in position

Plant capacity of the machine

Under the right circumstances it is possible to plant approximately 10,000 daffodils or 25,000 crocuses/small bulbs per hour. The speed of the planting may vary depending on factors like soil type, location and bulb size.

Embankment planting

Especially for sloping areas we offer a machine that can plant on banks with a maximum angle of 30 to 35 degrees. This machine is provided with caterpillar tracks, and an additional plant foot so that a uniform effect can be achieved.

Embankment planter in action

Planting with side planter

In order to plant closer to trees, we recently developed a side planter. This machine has a plant foot mounted on the side of the machine which enables us to plant between, or very close to, trees.

Planting with a side planter

Result on the bank in Spring

The JUB YouTube channel

On our JUB YouTube channel, we show various videos of mechanical planting in different locations. You can also subscribe to the latest JUB videos.

Feeding, mowing and fertilisation plan

Feeding and fertilisation plan

You can use an environmentally friendly organic fertiliser. The organic component in this fertiliser is converted by soil organisms into humus. Humus improves the structure of the soil to retain its nutrients. However, the use of chemical fertilisers is also possible. Usually, a total of 2 kg of 12-10-18 per 100 m² is required, to be given in two rounds. Fertilising after the frost, before the bulbs are coming up, is preferred. The best time is just before or during a shower as substances will immediately get dissolved.

Fertiliser unit on the planting machine

Manual feeding of bulbs in grass

Mowing

When using naturalising bulbs in grass areas, a commonly accepted guideline is that mowing can be started an average of six to eight weeks after flowering. This will allow the bulbs enough time to produce seeds and die back naturally. An exception to this rule is the allium, which can be mown directly after flowering. The foliage of most alliums has already died back before flowering.

Mowing, on average six to eight weeks after flowering

JUB cares for quality

Quality and know-how

At JUB Holland attention to detail is very important to guarantee good quality:

- Storage of bulbs until packing and shipping
- Health of the bulbs
- True to name and size, delivery of the bulbs
- Packaging and transportation of bulbs
- Packing of bulbs in net bags with colour labels

Quality control

Net bag with colour label

Our Specialists and terms

Acceptance: By placing an order with Beechill Bulbs Ltd, you acknowledge that you have read and agree to be bound by these terms and conditions of business.

1. **Minimum Order:** To avail of trade/wholesale rates, all initial orders must have a minimum value of €300 plus VAT.
2. **Order deadlines:** In order to guarantee supply of varieties, orders must be submitted before the end of January (for spring stock) and mid June (for autumn stock).
3. **Delivery Charges:** Delivery is included for orders exceeding €500 plus VAT. For smaller orders, delivery is chargeable.
4. **Delivery method:** Your order will be delivered by us directly or by courier. The most cost effective method will be chosen. This is determined by the size, weight, destination and urgency of the shipment.
5. **Prices:** Prices quoted are always in EURO (€), excluding VAT @ 13.5%
6. **Payment terms:** All goods must be paid for in advance (for delivery) or on collection. Cash, Debit & Credit cards, Electronic funds transfer & cheques are accepted. For cheque payments goods will only ship when payment has cleared our bank account (allow 3 working days).
7. **Credit facilities:** Are offered at our discretion and we reserve the right to refuse credit.
8. **Credit terms:** Where credit has been given, it is strictly on a 30 days from our invoice date. After this period we reserve the right to charge interest at the rate of 2% per month thereafter on accounts not paid.
9. **Conditions of sale:** Goods remain the property of Beechill Bulbs Ltd until payment in full has been received. Stock is only reserved on receipt of payment.
10. **Order changes:** These can be accepted up to one week before delivery. For items not in stock it can take up to an additional two weeks before the order is ready to ship.
11. **Quality:** It is your responsibility to check your goods upon receipt, for quality issues. Bulbs must be stored in a well ventilated cool and dry place (bulbs must NOT be allowed to get wet). All orders are checked for quality and accuracy before shipment.
12. **Claims:** Must be made within 5 working days from the receipt of the order. The value of the claim can never be more than the invoiced amount of the bulbs (not including any delivery charges). Beechill Bulbs Ltd are not responsible for losses arising from improper storage, extended storage, planting methods, soil conditions, or other factors beyond our control once the stock has left our warehouse.
13. A) Goods are sold on a non-return basis.
B) Return shipments without prior written authorisation will not be accepted.
14. **Disclaimer:** Beechill Bulbs Ltd are not responsible for non-performance or loss of bulbs because of improper storage, planted too deep or too shallow, pests, under or over watering, or otherwise injured from the use of pesticide or fertilizer or any growing conditions beyond our control.
15. **Varieties:** While we strive to provide true varieties at all times, any non true varieties must be communicated to us as soon as they are identified in the growing season. Beechill Bulbs Ltd reserves the right to substitute varieties with similar or better varieties where there is a problem with supply of a certain variety. The products listed in this catalogue are offered subject to availability. Beechill Bulbs Ltd shall be under no liability for any failure or delay in performing a contract arising from lack of availability.
16. **Applicable Law:** These terms and conditions and any agreement to purchase bulbs from Beechill Bulbs Ltd shall be governed by and construed in accordance with Irish law.
