2025/2026 Autumn Landscape

Dear Customer,

It's with great pleasure that we present our collection of Autumn Planting Bulbs. Your displays should have peaked by now, and at this stage we're sure you have fed them and scheduled them for cutting back (6 to 8 weeks) after the last flower.

Due to unseasonable weather at critical times for flower bulb production in recent years, yields have been consistently lower than expected. This, coupled with increasing demands from the cut flower industry, means that loose bulb supplies are impacted. Warnings from several growers' state that not only will the quantities of tulip bulbs available for dry bulb sales be lower, but many bulb sizes are expected to be 1 grade smaller (i.e. 12/+ > 11/12, and 11/12 > 10/11).

It's not expected that there will be any dramatic impacts felt on the other dry bulbs, such as Narcissus, Hyacinth, Allium, Muscari, Crocus, etc, but reduced acreage in these lines could eventually lead to supply pressures.

bulbs.ie

We suggest that you place your bulb orders as soon as possible for best choices of varieties and availability. We take bulb orders at any time and will place them in the queue on a first-come, first-served basis.

When planning your autumn gardening, we can help you visualize your result by using the Designer App by JUB. You provide us with a photo of an area and thoughts about what you may want planted – bulb types, mixtures, colour schemes – and we will supply you with visual pictures to help you decide. If you would like us to help with an area for planting, contact us on design.support@bulbs.ie

If you are thinking of planting 100 metres or more, our mechanical planting service may be the answer. Mechanical planting offers time and costs effective solutions when planting large areas. If you'd like a site visit to assess for suitability and a quote, please contact us on 057-9322956 or by email mechanical.planting@bulbs.ie.

Pollinators and biodiversity are popular topics, and here at Beechill Bulbs, we're committed to not only promoting bulbs that are beneficial to our pollinators, but also to doing our bit as a business supporter of the All-Ireland Pollinator Plan (AIPP). To that end, we have several immediate actions that are recommended by the AIPP – earthen bank for burrowing insects, herbicide elimination in yard areas, bug hotels in appropriate locations, and extended flowering planters in public spaces with pollinator friendly types of plants. Talk to us about the varieties and mixtures of spring flowering bulbs that are most beneficial for pollinators.

Our website is where you can find the most updated information on available varieties and stock. If you haven't signed up already, please go to <https://bulbs.ie/> to register. Once approved, you will have visibility to not only currently available stock, but pricing and ordering capabilities too.

As always, we are here to help, don't hesitate to send us an email to info@bulbs.ie or call us at 057 9322956 and we will be more than happy to assist you.

Happy planting!

Website resources

To keep you up to date with the latest information and trends in flower bulbs, we maintain a range of articles on the blog section of our website. These cover areas as diverse as Biodiversity, Potting for towns & villages, Cut flower garden development, and so on. Scan the QR code with your phone to visit the site and browse the articles.

FLOWER BULBS IN POTS AND TUBS

Spring-flowering bulbs beautify streets and squares in villages and cities. They add colour to early spring. Colourful rows of tubs and bowls with spring bulbs brighten residential and shopping streets, squares and shopping centres.

OUR TOP 25 FLOWER BULBS

There are hundreds of varieties of spring-flowering bulbs for gardens and parks. We highlight the 25 best in this article on our website. Robust varieties, most reliable perennialising or naturalising, that are some of the most sought after attributes.

FLOWER BULBS ON ROOF GARDENS

Lush roof gardens are adorning more and more roofs. Beautiful borders of perennials combined with waving ornamental grasses. Together with the supporting structure of trees, hedges and shrubs, they form a beautiful unity. Flower bulbs on the roof are strategic eye-catchers in spring and summer.

FLOWER BULBS FOR A PICKING GARDEN

Whether it concerns 10m² or 100m², creating a cutting garden is always possible. Commercial or for personal use. Make a plan. What colours, types and flowering times do you have in mind? For a successful cutting garden, it is important to select the right varieties. Not every daffodil or tulip is suitable. We are happy to advise you.

FLOWER BULBS & BIODIVERSITY

Biodiversity is a term we use to indicate the richness of nature. It concerns the great diversity of animals, plants, habitats and genes. Biodiversity creates ecosystems in which organisms can live, such as humans, through interaction with environmental factors..

FLOWER BULBS COMBINED WITH PERENNIALS

A combination of flower bulbs with perennials creates a varying palette of flowering times, colours and scents. We can advise you on the best combinations. Bulbs and perennials reinforce each other.

Bulbs for cemeteries

COLOUR AND COMFORT WITH BULBS AT CEMETERIES

Bulbs are an ideal choice for cemeteries, where they add both serene and aesthetic value to the surroundings. Varieties such as narcissus, crocuses, and snowdrops bloom early in the year and return annually, providing a lasting, colourful contribution to the resting places. These flower bulbs require little maintenance and fit perfectly within the ecological green management of cemeteries.

At Beechill Bulbs we will help you to combine appropriate bulb mixtures, that contribute to a sustainable and calming environment, where biodiversity and remembrance come together.

Inspiration (international)

The Vibrant Verge

WHY THIS CONCEPT?

Biodiversity is increasingly important in the urban environment. In addition, much attention is paid to ecological management and development of wildflower vegetation. The Vibrant Verge concept has been developed to increase biodiversity and guarantee a long flowering period.

Within this concept, the strengths of annual, biennial and perennial (indigenous) seed mixtures are combined with a tailor-made bulb mixture. This ensures vegetation with a long flowering time, increased biodiversity, extensive, ecological maintenance and the seasonal experience gets enhanced. Our sales team is happy to tell you more about the concept. For more information email pollinators@bulbs.ie or scan the QR code to the right.

Climate adaptive planting

APPLICATIONS OF BULBS UNDER DRY CONDITIONS. BETWEEN GRASSES AND PRAIRIE PLANTS

A prairie garden often has a low-maintenance planting system, with a natural balance between plants. The combinations of strong perennials and ornamental grasses give a completely different image in colour and structure five to six times a year. The image is attractive all year round. Because many prairie plants start late, bulb plants are used for colour in the spring.

Not all flower bulbs are equally drought resistant, but species from a continental climate are candidates for the increasingly warmer and drier locations in our changing climate, provided that the drainage is good: these bulbs cannot withstand wet winters in combination with frost.

APPLICATIONS OF BULBS UNDER WET CONDITIONS. IN WET GARDENS AND PUBLIC GREEN SPACES (INCLUDING WADIS)

A whole new form of specially designed wet locations are so-called wadis. A wadi actually works just like a floodplain or a river bed. It is a designated place that is occasionally completely flooded. At this location, the water can slowly sink in and is then slowly transported away to the ground and surface water. In this way it protects the sewage system.

A wadi system is designed to collect a certain volume of water. The wadi is usually calculated for a maximum water depth of around 30 to 40 cm and is then under water for a short period, usually no more than 24 hours. Outside these inundation periods, the wadi is often dry for a long time.

Parks & Naturalising bulbs

NATURALISING AND LOW MAINTENANCE BULBS FOR WOODLAND AREAS, PARKS AND BORDERS

Naturalising bulbs, many of them being native varieties, can be found in this section.

Our naturalising bulbs are all nursery grown and not collected from the wild! In general, they require minimal maintenance and many of them will grow in (semi-) shady locations.

Woodlands & parks

MOST POPULAR NATURALISING BULBS

The most popular naturalising bulbs in woodlands are undoubtedly snowdrops, wood anemones and bluebells (non scripta), all of which native to almost the whole of Ireland on various types of soils and habitats. The rhizomes of Anemone Nemorosa will spread steadily if conditions are right, around or under trees.

All over Ireland there are spectacular bluebell woods where millions of violet-blue flowers spread their sweet scent, but bluebells can also be found in more open spaces. Galanthus (snowdrops) are usually the first flowers to appear in winter. The discussion whether they need to be planted as dry bulbs or 'in the green' will probably never end. We always advise to plant snowdrops in late summer or early Autumn as fresh dry bulbs for the best result. For mixes and combinations of woodland and naturalising bulbs, contact us at info@bulbs.ie or scan the QR code to the right for more information.

Leucojum aestivum Gravetye Giant

Galanthus nivalis & Eranthis hyemalis

Hyacinthoides non-scripta

**Corydalis solida****Fritillaria meleagris**

READY TO USE MIXTURES

When you want to get started with naturalising bulbs, we offer in this catalogue a very wide selection of true species from reliable, often small-scale nurseries. For those who find it difficult to choose varieties which combine well, there are beautiful ready-to-use mixtures available.

Those mixtures provide colour for months and we are happy to advise whether your preferred mixture is also suitable for the particular project. This depends on factors such as mowing, pruning, light and type of soil. More and more clients are asking for bespoke mixtures, because they want something special: a mixture or planting plan that is completely geared to the location with a theme that matches the specific project. The specialists can advise you.

**Anemone nemorosa**

Naturalising bulbs

SINGLE SNOWDROPS - GALANTHUS NIVALIS - P. 118

Galanthus likes moist soil under deciduous trees and shrubs, but also thrives in a warm, sunny location.

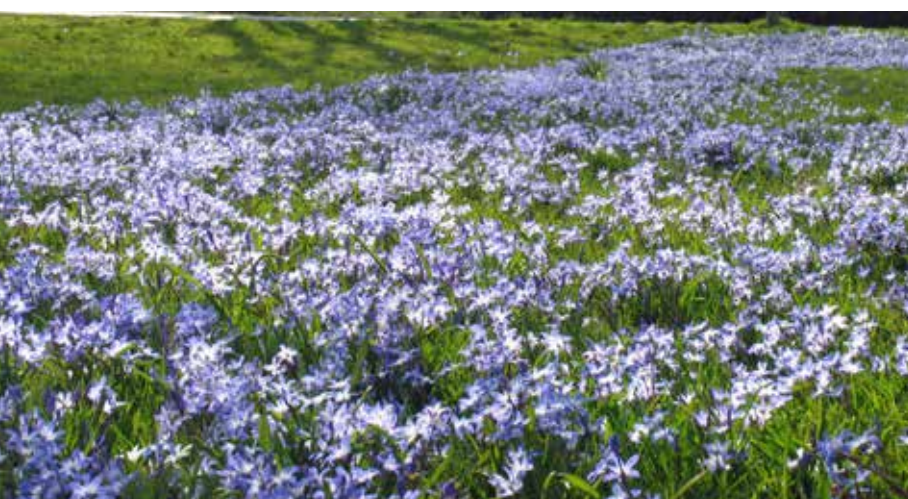

2-3

15 cm

150/m²

GLORY OF THE SNOW - CHIONODOXA LUCILIAE - P. 116

Chionodoxa grows in all well drained soils in sunny or semishaded places. It is therefore very suitable for use under deciduous trees, shrubs and hedges.

3-4

15 cm

200/m²

WOOD ANEMONE - ANEMONE NEMOROSA - P. 115

Anemone nemorosa feels at home in a shady and humid place. This ground covering variety must be planted immediately upon arrival.

3-4

10 cm

150/m²

HOLLOW ROOT - CORYDALIS CAVA - P. 124

Corydalis cava prefers full shade between trees or shrubs, in a humus-rich soil containing moisture. *Corydalis cava* will produce full ground cover under the right conditions.

3-4

20 cm

50/m²

WOODLAND TULIP - TULIPA SYLVESTRIS - P. 104

Tulipa sylvestris likes a moist, nutrient-rich location in full sun. It grows well in grass and in light shade.

5

30 cm

150/m²

SNAKE'S HEAD FRITILLARY - FRITILLARIA MELEAGRIS - P. 117

Fritillaria meleagris or 'snake's head fritillary' needs a moist, moderately nutrient-rich soil. They also feel most comfortable in light shade.

4-5

20 cm

100/m²

Naturalising bulbs

CROCUS TOMMASINIANUS - P. 111

This crocus prefers a sunny spot or under deciduous shrubs. The crocus feels at home in almost all soil types as long as they are not too wet for too long.

2

10 cm

200/m²

POET'S NARCISSUS - NARCISSUS POETICUS (VAR. RECURVUS) - P. 107

This is a beautiful late flowering, narcissus. Single, slightly scented flowers. Likes humus-rich soil and a sunny to semi-shaded location.

5

40 cm

60/m²

ENGLISH BLUEBELL - HYACINTHOIDES NON-SCRIPTA - P. 118

English Bluebells prefer a light shade in a moderately dry to moderately moist soil.

4-5

30 cm

100/m²

DOG'S TOOTH VIOLET - ERYTHRONIUM PAGODA - P. 125

Erythronium pagoda has beautiful flowers and attractive light mottled leaves. This variety thrives in a sandy humus-rich soil in shade to partial shade.

4-5

25 cm

100/m²

SIBERIAN SQUILL - SCILLA SIBERICA - P. 123

These scillas attract many bees. Plant them in a sunny to semi-shaded place in well-drained soil. Scillas propagate quickly through bulblets as well as seeds.

3-4

15 cm

150/m²

SUMMER SNOWFLAKE - LEUCOJUM AESTIVUM - P. 120

The name 'Summer Snowflake' is misleading, it flowers already in April / May. They grow well in a moist soil and are therefore suitable for use in clay or loamy soil.

4-5

30 cm

75/m²

Naturalising bulbs

WILD GARLIC - ALLIUM URSINUM - P. 115

'Wild Garlic' prefers a sunny or semi-shady spot in moist, calcareous soil. This allium produces a strong garlic-like smell during the flowering. Plant bulbs immediately upon arrival.

5

35 cm

100/m²

NAKED LADY - COLCHICUM AUTUMNALE - P. 112

Colchicums mainly grow in woodland and in wet meadows. They love a sunny to partial shaded place. They can also be used for indoor flowering, without soil or water.

10-12

12 cm

30/m²

DROOPING STAR OF BETHLEHEM - ORNITHOGALUM NUTANS - P. 122

Ornithogalum nutans has broad leaves and prefers a sunny to semi-shaded location. The 'Drooping Star-of-Bethlehem' prefers a moist, limy soil.

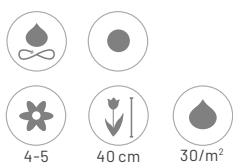

4-5

25 cm

100/m²

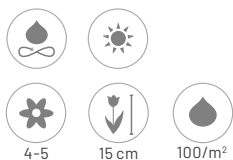

ARUM ITALICUM - P. 124

Arum italicum performs best in damp soil in shade or semi-shade and can easily be combined with ferns, ivy and hostas. The red-orange berries appear in August.

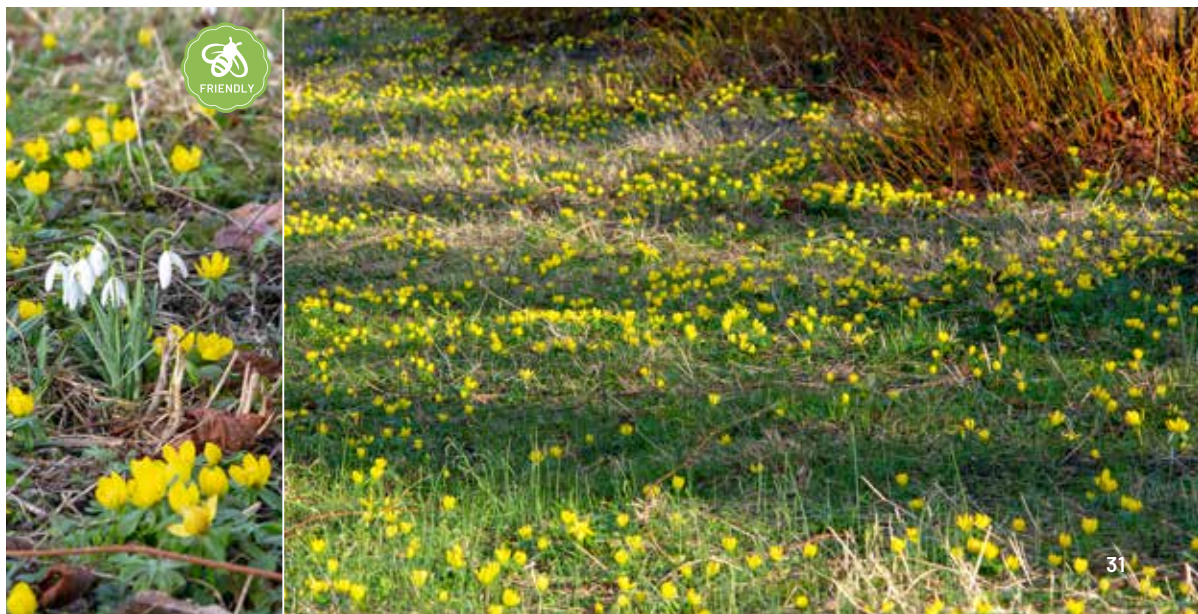

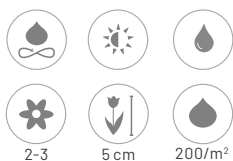

STAR OF BETHLEHEM - ORNITHOGALUM UMBELLATUM - P. 123

'Star-of-Bethlehem' likes a sunny to slightly shaded place on moderately moist and moderately nutrient-rich soil.

WINTER ACONITE - ERANTHIS CILICICA - P. 125

The winter aconite is one of the earliest flowering bulbs. *Eranthis cilicica* does well under deciduous trees and shrubs.

Naturalising bulbs

TURKISH GLORY OF THE SNOW - CHIONODOXA SARDENSIS - P. 116

Chionodoxa grows in all welldrained soils in sunny or semishaded places. It is therefore very suitable for use under deciduous trees, shrubs and hedges.

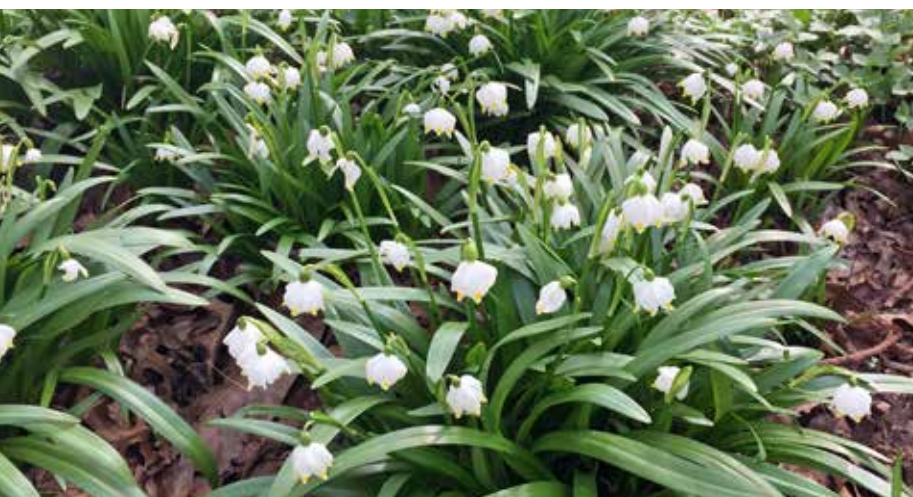

3-4

15 cm

200/m²

SPRING SNOWFLAKE - LEUCOJUM VERNUM - P. 120

The real spring bell. It flowers in April/ May and can be used well in moist soil and is therefore excellent for use in clay or loamy soil.

5

30 cm

75/m²

YELLOW WOOD ANEMONE - ANEMONE RANUNCULOIDES - P. 115

The yellow wood anemone feels at home in a shady and moist place. This ground cover should be planted immediately upon receipt.

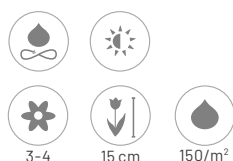

3-4

15 cm

150/m²

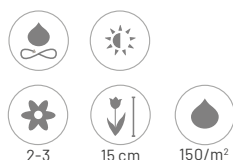

EASTERN ANEMONE - ANEMONE BLANDA - P. 115

The eastern anemone feels at home in a semi-shaded place. For best results, this ground cover should be soaked in water for a few hours before planting.

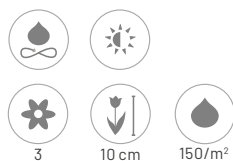

STRIPED HYACINTH - SCILLA MISCHTSCHENKOANA - P. 123

Very early flowering scilla. Plant them in a sunny to semi-shaded position in well-drained soil. The scilla multiplies rapidly by means of the bulb and by seed.

ALPINE SQUILL - SCILLA BIFOLIA - P. 123

These scillas attract many bees. Plant them in a sunny to semi-shaded place in well-drained soil. Scillas propagate quickly through bulblets as well as seeds.

Mechanical planting

MECHANICAL PLANTING, FERTILISER & MOWING

Our planting machine makes light work of large projects. Running bulbs into existing grassland and verges with ease. This machine can plant up to 10,000 narcissus sized bulbs or 25,000 crocus sized bulbs in one hour. We also provide care and maintenance advice for your plantations in this chapter. Be sure to visit the website for up to date information.

Mechanical planting

With our planting machines it is possible to plant large quantities of flower bulbs under grass, along roadsides, in lawns, on roundabouts, etc. By planting the bulbs with our machine you will achieve a major reduction in labor costs. On our website you can find a lot of information about mechanical planting, how the machines work and the many possibilities. By scanning this QR code you will immediately go to the correct web pages.

The planting machine

Filling the machine with bulbs

Mixed bulbs in the machine

Bulbs on the belt before planting

Bulbs are being planted

Rollers put turf back in position

Fertilisation & mowing

To preserve your bulbs, it is very important to provide them with food. It is possible to carry out feeding in Autumn and Spring with our specially selected biological bulb fertiliser.

FERTILISATION

Autumn fertilisation

At the same time as the machine planting of flower bulbs in grass, fertilisers can be added.

Spring fertilisation

An environmentally friendly organic food can be used in Spring. The organic component in this fertilizer is converted into humus.

MOWING

When using naturalising bulbs in grass areas, a commonly accepted guideline is that mowing can be started an average of **six to eight weeks** after flowering.

This will allow the bulbs enough time to produce seeds and die back naturally. An exception to this rule is the allium, which can be mown directly after flowering. The foliage of most alliums has already died back before flowering.

Mixtures for verges and grass areas

MAINTENANCE FRIENDLY BULBS FOR ROAD SIDES AND GRASS AREAS

Are you looking for easy, manageable mixtures which will come back year upon year? Simply look in the section 'Bulbs for verges and grass areas'. Here you will also find the bee and butterfly mixtures.

Some of our mixtures just flower in the early Spring, whilst others start early and flower until the end of June! Depending on your mowing regime, you can choose the most suitable mixtures.

Phase 2, May - June

Mixtures for verges and grass areas

FLORIADE (3 PHASES)

Phase 1, February - March

This mixture was a great success at the main entrance of Floriade 2012 in Venlo in the Netherlands. From early Spring until summer you will enjoy the great diversity of flowers in this mixture.

2-6

30-90 cm

120/m²

7>

Phase 2, March - April

Phase 3, May - June

AMSTERDAM

A well-balanced mixture of many types of large flowering daffodils in different forms, colours and shapes.

2-4

30-50 cm

100/m²

6 >

EDE (2 PHASES)

Phase 1, March - April

A surprisingly simple mixture with two colour periods. A bright yellow start in March, followed by pure white in April-May.

3-5

20-30 cm

120/m²

6 >

Phase 2, April - May

Mixtures for verges and grass areas

APELDOORN

A colourful mixture of botanical narcissi, with a contrasting addition of two tulip varieties.

2-5

20-50 cm

100/m²

6 >

OEGSTGEEST

This early flowering mixture contains various botanical tulips, daffodils, scillas and other various botanical bulbs.

2-5

10-35 cm

385/m²

7 >

ZWOLLE

This mixture in pure white is an elegant combination of white crocuses, white chionodoxas, white scillas, white narcissi and white tulips.

2-4

10-50 cm

220/m²

6 >

LIVERPOOL

Cheerful flowering Spring mixture with various types of daffodils, narcissi and striking red tulips.

3-4

25-50 cm

130/m²

6 >

VOLENDAM (2 PHASES)

Phase 1, February- April

Mixture Volendam is very suitable for road verges with rough vegetation, with its early and late yellow daffodils, followed by alliums and camassias as an extra surprise.

2-6

40-90 cm

105/m²

7 >

Phase 2, May - June

Mixtures for verges and grass areas

HELSINKI

Intense blue and fragrant hyacinths in combination with various botanical narcissi and a botanical tulip in March - April.

3-5

15-40 cm

125/m²

6 >

KENT (2 PHASES)

Colourful mixture with various narcissi and tulips in March / April, followed in May / June by camassias and alliums.

3-6

20-70 cm

110/m²

7 >

BRIGHTON (3 PHASES)

Three different colours in one mixture. Yellow narcissi start off the show in March, followed by white narcissi and finishing with camassias in various shades of blue.

3-6

15-70 cm

100/m²

7>

Mixtures for verges and grass areas

MANCHESTER

A late Spring flowering colour sensation for verges and grass areas. A mixture of various alliums, camassias and narcissi.

5-6

50-100 cm

80/m²

7>

EINDHOVEN (2 PHASES)

This mixture is designed for road verges with rough vegetation. The flowering period starts with yellow daffodils, followed by fragrant narcissi in late-April. In May/June the alliums deliver a purple finish in the tall grass.

2-6

30-80 cm

100/m²

7>

VENLO

Create a colour sensation in roadsides and grass areas with this intriguing mixture! Impressive blooms on start to flower in late-Spring. Flower heads of light and deep purple, along with creamy white, last for weeks.

5-6

80-90 cm

60/m²

7>

ALKMAAR - BUTTERFLY MIXTURE (2 PHASES)

Phase 1, May - June

Phase 2, June- July

Butterflies are an important link in the food chain and furthermore pollinate flowers when they visit them to suck up the nectar. Butterflies have high standards for their habitat and will only appear in places where the conditions are right. By planting this special mixture, butterflies get attracted in late Spring.

5-7

60-90 cm

150/m²

Eye-catcher Indigo

Eye-catchers

BULBS FOR SPECIAL PLACES IN PUBLIC SPACE

Are you looking for a striking bulb mixture for a special location, to celebrate a specific event or to emphasise an important location?

Visit this category 'Eye-catchers'!

These mixtures are also very suitable for containers and roundabouts. We have selected them by colour, height and flowering time.

Eye-catchers Keukenhof

The colourful and long-flowering mixtures that have been planted in the special borders at Keukenhof since 2019 were designed by Carien van Boxtel. These mixtures are not only beautiful but also very special. They start flowering around mid-March and continue to bloom until mid-May.

Please note: these exclusive mixtures are limited available!

NUDE & WHITE 2019

One of the two borders designed by Carien in 2019 was 'Nude & White': A fresh white-green border with salmon and 'nude'-coloured accents.

2-6

12-80 cm

165/m2

NUDE & DARK 2019

The other border designed by Carien in 2019 was 'Nude & Dark': A dramatic dark border with salmon and black/purple accents.

2-6

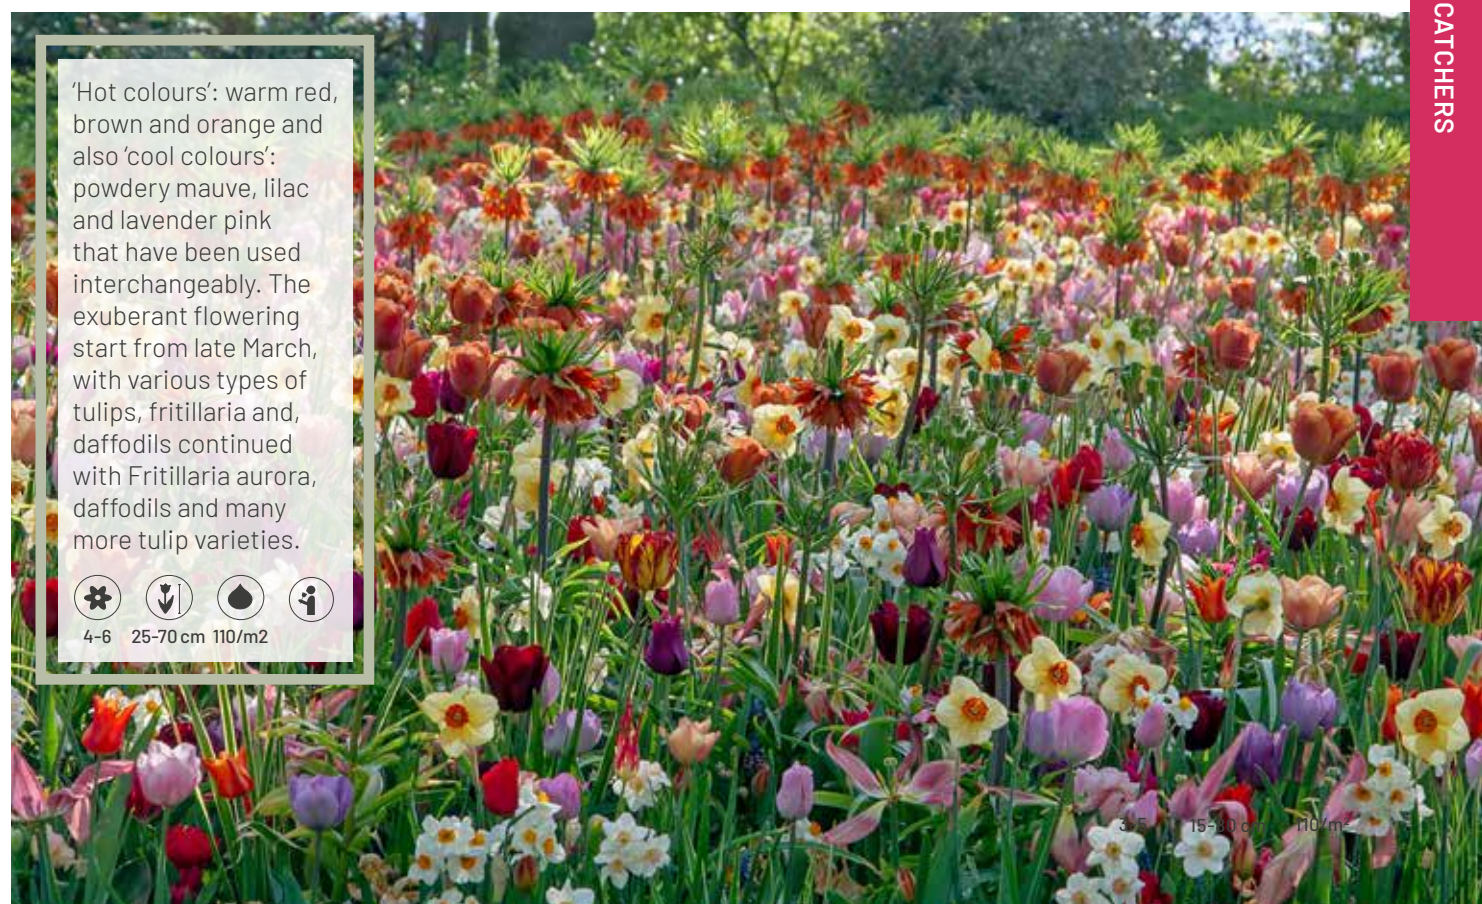

12-80 cm

130/m2

HOT & COLD 2020

'Hot colours': warm red, brown and orange and also 'cool colours': powdery mauve, lilac and lavender pink that have been used interchangeably. The exuberant flowering start from late March, with various types of tulips, fritillaria and, daffodils continued with Fritillaria aurora, daffodils and many more tulip varieties.

4-6

25-70 cm

110/m²3-5 15-30 cm 110/m²

WILD GARDEN 2021

'Wild Garden' is an ode to William A. Robinson, (1838 - 1935) an Irish gardener who was at the origin of the concept of the 'Cottage Garden'. He started planting mixed flower borders in a more casual way. He was a great advocate of the use of naturalising bulbs.

3-4

25-100 cm

110/m²

Eye-catchers Keukenhof

SILK 2022

A design based on the beautiful colours of an embroidered silk dress of Queen Maxima. Soft antique faded colours such as apricot, lilac, soft pink and white tones and regal purple, designed by Jan Taminiau. A wonderful mixture.

4-5 30-125 cm 100/m²

VELVET 2023

Carpets, woven in the most fantastic repeating patterns based on flowers and floral motifs and rich, colour schemes, formed the inspiration. Saturated colours of burgundy red, black, purple, bronze, ocher, warm orange and brown were chosen, with contrast colours/accents of warm yellow and cream.

3-5 25-100 cm 110/m²

INDIGO 2024

Inspired by the many shades of indigo, a very diverse mixture was chosen. The naturalizing bulbs provide the blue tone, while the mauve and lilac shades of the tulips and the moon-yellow shades of the daffodils provide depth and colour contrast.

2-5

25-70 cm

110/m²

Eye-catchers

VICTORY ALKMAAR

An early-flowering, high-contrast combination. White crocuses with bright red crocus-like short tulips. A nice fresh start to the spring season.

3-4

15-25 cm 200/m²

ROYAL PRINCES

3-coloured mixture of single early tulips. Identical in shape but different in colour. Compact growth. A favourite mixture every year at Keukenhof.

3-4

30-35 cm 100/m²

PROMISE OF SPRING

A fresh early-flowering combination. Short pink with white kaufmanniana tulips mingled with purple/white striped and purple and lilac large-flowered crocuses.

2-4

10-20 cm 200/m²

IMPERIAL FRIENDS

A favourite among our eye-catchers. A cheerful mixture of orange, yellow and white. Stately large-flowered fosteriana tulips.

3-4

35-40 cm 100/m²

HAVE PLEASANT DREAMS

A winner with scent and colour. Several hyacinth varieties, beautiful salmon-coloured greigii tulips and subtle bicoloured blue grape hyacinths.

3-4

35-40 cm 100/m²

IRRESISTIBLE FRAGRANCE

The scent of spring awaits you. Beautiful combination of many hyacinth varieties. Indispensable in spring borders and flower beds.

3-4

25-35 cm 50/m²

Eye-catchers

LUXURY

Combination of two beautiful bicoloured tulip varieties in lilac, pink and white tones.

4-5

40-45 cm 100/m²

PURPLE DETAILS

Striking purple and white lily-flowering tulips in harmony with various yellow and white narcissi. Fragrant combination.

4-5

30-55 cm 100/m²

BRIGHT SIDE

A classic. A favourite mixture in our range for many years. A simple but exuberant combination of tulips and narcissi in yellow, orange and white.

4-5

35-40 cm 100/m²

PALETTE OF SPRING

A striking yet subdued combination of lily-flowering tulips with richly flowering narcissi and bicoloured grape hyacinths in the base..

4-5 15-55 cm 150/m²

FESTIVAL OF COLOURS

The name says it all. A feast of colour. Many types of tulips and various hyacinths for scent and colour.

4-5 25-55 cm 100/m²

PEACEFUL PASTELS

A gentle pastel mix of various double tulips. A subdued mix for an impressive display in the spring border.

4-5 40-55 cm 100/m²

Eye-catchers

AMORE

Pink represents love. A striking combination of 3 beautiful tulip varieties. Stunning in combination with e.g. blue grape hyacinths, but also among early-sprouting perennials.

4-5 35-40 cm 100/m²

DAILY NEWS

A classic in our eye-catcher range. A daring combination and therefore striking in large flower beds or perennial borders.

4-5 45-50 cm 100/m²

ALL COLOURS

The name is clear, a cheerful and festive mixture of tulips in all colours.

4-5 45-55 cm 100/m²

FOXTROT PARTY

A combination of 3 double early tulips with orange, salmon, pink and red colours. A special and daring mix.

4-5 30-35 cm 100/m²

MOONDANCE

The 'black' tulip in this mixture makes it a colourful combination with a twist. Only tulips

4-5 35-45 cm 100/m²

SUNSHINE

One of the combinations with the yellow crown imperial. High-contrast tulip varieties that reinforce each other with playful and fragrant narcissi in between.

4-5 35-80 cm 100/m²

Eye-catchers

PINK REVELATION

The fragrant white and pink hyacinths form the basis of this mainly pink and red bulb mixture.

4-5 25-55 cm 70/m2

PAINTERS CHOICE

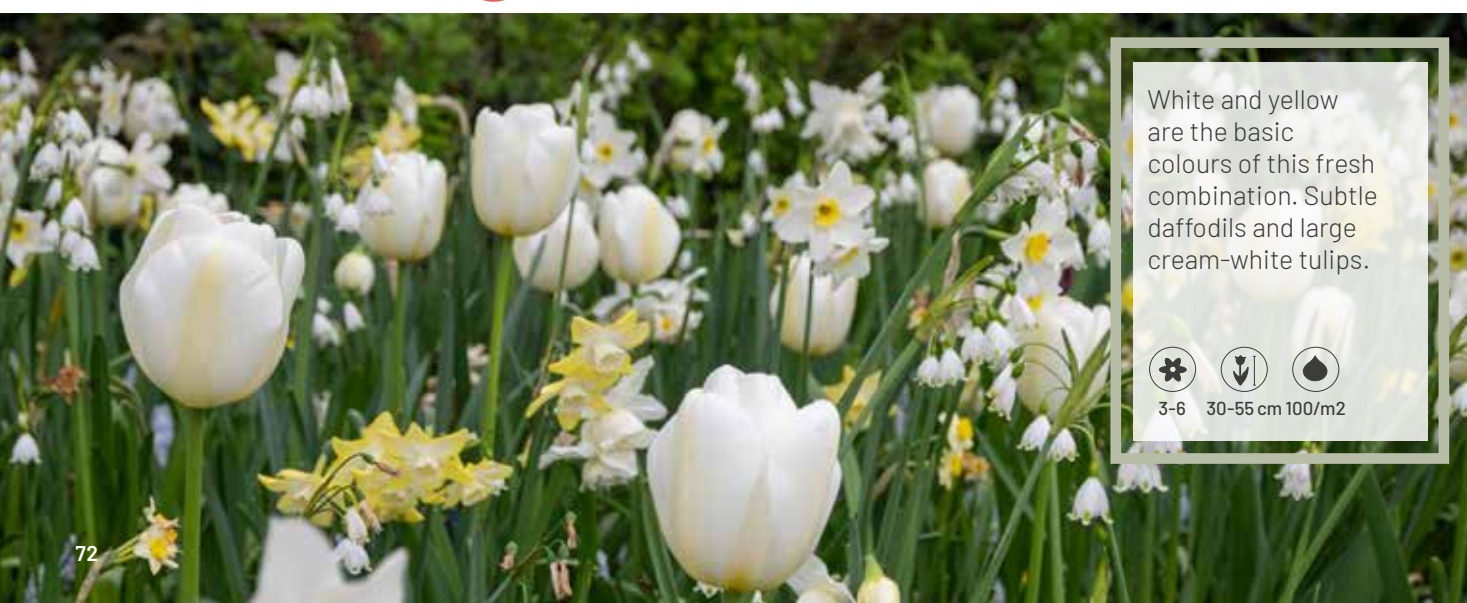

One of our most special eye-catchers. Flowers that could come straight off a 17th century painting. Bicoloured tulips and, among others, crown imperials.

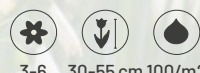

4-5 35-80 cm 75/m2

ARCTIC FRESH

White and yellow are the basic colours of this fresh combination. Subtle daffodils and large cream-white tulips.

3-6 30-55 cm 100/m2

PURPLISH

A combination with the focus on purple but with pink and white accents. Pink and purple hyacinths provide fragrance and bloom in the base of this mixture.

4-5

25-55 cm 80/m²

MASSIVE SPRING

Overwhelming combination of white, pink and lilac. This mixture of both tulips and daffodils makes a striking appearance in parks, but e.g. also on roundabouts.

4-5

40-55 cm 100/m²

YELLOW FRESH AND A TOUCH OF PINK

One of our favourite combinations. Various types of yellow with pink-red accents. A mixture full of colour and scent.

3-4

25-35 cm 80/m²

Eye-catchers

PURPLE BLING

A combination of not too tall single early 'Prince' tulips. Striking and compact.

4 35-40 cm 100/m²

FLAMING BEAUTY MIX

A mix of exclusively bicoloured tulips. Special and striking. Tulips that resemble the 'historical' Rembrandt tulips. An expressive mix that will draw a lot of attention.

4-5 35-45 cm 100/m²

SPRING PEONIES

Double late tulips that resemble peonies. Pastel colours make this combination applicable everywhere. Plant large numbers for the best results.

4-5 45-50 cm 100/m²

FOSTERIANA BEAUTIES

Fosteriana, a group of tulips, fairly early flowering and large flowers. This combination consists of 3 beautiful members of the group.

3-4 35-40 cm 100/m²

HARMONY OF PURPLES

Another beautiful combination with purple as the main colour. 3 types of triumph tulips that match each other perfectly.

4-5 40-50 cm 100/m²

VIBRANT SUNSET

A combination of 4 double tulips. Strong in colour and therefore striking. For a spot in a planting bed that will receive the necessary attention. A floral sunset.

4-5 30-40 cm 100/m²

Eye-catchers

ENERGY

The yellow and orange narcissi play an important role in this combination and form the basis of a captivating mix of yellow, orange and pink.

4-5 30-80 cm 100/m²

SUN FEVER

Vibrant colour combination of three large-flowered Darwin hybrid tulips. For sunny locations that receive full attention.

4-5 50-55 cm 100/m²

DELICATE CONTRASTS

An almost romantic combination of blue grape hyacinths with light pink botanical tulips. A combination that can be applied anywhere.

4-5 15-20 cm 100/m²

PASSION

Cheerful colour combination of various spring bulbs. Fragrant hyacinths, impressive crown imperials and many types of tulips. So tempting.

4-5 15-90 cm 120/m²

HAPPY FRIDAY

A 'no nonsense' combination of (pink) red, white and yellow. Cheerful colours to start the weekend. Lots of tulips and some playful yellow daffodils.

3-5 20-55 cm 60/m²

WINING AND DINING

The colours of this combination give the impression of many types of wine. Red, rosé and sparkling white. A mixture that will fit perfectly in a restaurant garden.

4-5 30-60 cm 100/m²

Eye-catchers

SWEET DREAMS

An impressive combination of pink, white and green. A soothing pastel mix that fits beautifully in borders or public gardens.

4-5 25-55 cm 100/m²

DANCING TULIPS

Simple but so beautiful. Various Triumph tulips in white and pink with blue grape hyacinths as a background.

4-5 15-55 cm 150/m²

HEAVENLY SOFT

So many beautiful species together in a striking combination of pink, white, orange and salmon. A rich mix with a peaceful appearance.

3-5 35-45 cm 100/m²

FRESH SPRING

A combination of different types of bulbs with various shapes and special colours. A standout feature is the addition of the purple crown imperials.

4-5 15-90 cm 110/m²

DARING DISPLAY

Warm red and fresh white tulips, subtle white daffodils with, as extra special feature, the impressive white-green crown imperials. A bold combination.

4-5 25-80 cm 100/m²

PINK AND A TOUCH OF WHITE

A favourite eye-catcher. Various white and pink tulips. An elegant combination. Medium and high tulips, single and double flowers.

4-5 25-55 cm 100/m²

Eye-catchers

ELEGANT LILIES

All lily-flowered tulips are elegant. Especially this combination of white, orange and purple varieties. Their beautiful flower shape makes this mixture stand out even more.

5

50-55 cm 100/m²

MAGNIFICENT DUO

Classic blend of orange, yellow and two-tone blue. A rich combination with impressive colours.

4-5

15-30 cm 150/m²

FOXY FOXES

A combination of two double early tulips with soft yellow and pink colours. A special mix.

4-5

35-40 cm 100/m²

PINK DREAMS

Soft pastel shades from white to dark pink. A combination of hyacinths and tulips. A fragrant mixture.

SUNSET

A combination that is not only beautiful at the end of the day. It makes you happy. Striking orange triumph tulips with lightly scented narcissi.

PRESTIGE

Stately pink-red tulips contrast beautifully with the mix of various daffodils and smaller tulips. Contrasting but in harmony.

Eye-catchers

QUEENS

Special colour combination of two types of strong triumph tulips. Reddish-brown and striking pink.

4-5

45-50 cm 100/m²

CHEER YOU UP

3-coloured combination of impressive Darwin hybrid tulips. Red, yellow and purple. Striking in many ways.

4-5

55-60 cm 100/m²

REASON TO BE CHEERFUL

High-contrast red and white. 2 very short, mid-early tulips with cup-shaped flowers. Great for creating a special effect in borders or in public gardens.

4-5

25-35 cm 100/m²

ORANGE GLOW

Orange predominates in this combination. From bright to pastel. Striking combination in the spring border.

4-5 50-90 cm 100/m²

PURPLE PUNCH

Special combination of intense purple, lilac and lilac-pink colours with a touch of white for contrast.

4-5 40-50 cm 100/m²

QUIET CONTRASTS

A combination with style. Various triumph tulips in lilac, purple and salmon colours, combined with cheerful white and orange tazetta narcissi.

4-5 40-65 cm 100/m²

Eye-catchers

FIESTA

Stately combination of several late tulips. Impressive. A (late) spring party!

5 55-60 cm 100/m²

FRAGRANT SURPRISE

Purple and pink are the basic colours of this fragrant combination, with the addition of a few white accents of tulips and daffodils.

4-5 25-40 cm 60/m²

PURE & PASTEL

Pink, white and lilac. Pastel colours that glisten in the sun. As additional decorative elements, this combination also contains bee-attracting blue camassias.

4-5 45-80 cm 100/m²

FIREWORKS

Sparkling and flashy. A combination of orange lily-flowering tulips and 2 types of large-flowered yellow daffodils.

4-5 45-50 cm 100/m²

DAYLIGHT TO DUSK

Illustrious late-flowering combination of white and black tulips. A big contrast but immediately a striking appearance.

4-5 50-60 cm 100/m²

BOLD COLOURS

Combination of strong colours that stand out in late spring. A high contrast but that is why it is so special. Black, red and white and the icing on the cake: blue camassias.

4-6 25-80 cm 100/m²

Assortment Organic bulbs

VERIFIED AND CERTIFIED

We obtain our bio / organic flower bulbs from JUB Hollands own nursery and their associated reliable organic growers who do everything possible to grow their bulbs as organically and sustainably as possible.

These bulbs also deliver a great contribution to the welfare of bees, butterflies and other insects (biodiversity).

All organic bulbs carry
the SKAL logo

ORGANIC BULBS @ KEUKENHOF 2025

Since 2024, a new border has been added to Keukenhof with a combination of organic bulbs and peat-free grown perennials.

This border remains intact. Neither the bulbs nor the perennials will be removed. Only maintenance will take place. This border provides inspiration for both private individuals and gardeners.

Info about light, soil & bulbs/m2

Eye-catcher Velvet

Acceptance: By placing an order with **Beechill Bulbs Ltd**, you acknowledge that you have read and agree to be bound by these terms and conditions of business.

1. **Minimum Order:** To avail of trade/wholesale rates, all initial orders must have a minimum value of €300 excluding VAT. Prices based on Minimum Quantities – for example: Hyacinth – 50 bulbs; Tulip – 100 bulbs; Narcissus – 100 bulbs; Indoor – 50 bulbs; Crocus – 100 bulbs. Min quantity may vary. 10% surcharge applied to below minimum quantities.
2. **Order deadlines:** Order deadlines: In order to guarantee supply of varieties, orders must be submitted before the end of January (for Summer stock) or mid-July (for Autumn stock).
3. **Delivery Charges:** Delivery is included for orders of or more than €600 excluding VAT in value. For smaller orders delivery is chargeable.
4. **Delivery method:** Your order will be delivered by us directly or by courier. The most cost effective method will be chosen. This is determined by the size, weight, destination and urgency of the shipment. If you specified collection when placing your order, you will be notified of a collection date when the order is expected to be completed.
5. **Prices:** Prices quoted are always in EURO (€), excluding VAT @ 13.5% for bulbs. Prices are based on market availability and are subject to change during the season
6. **Currency risk:** All invoices are made out to, and payments are due in EURO (€) currency. For customers paying in non-EURO currency, the customer is responsible for any shortfall due to currency fluctuations, to ensure that the invoice is paid in full.
7. **Payment Terms:** Goods must be paid for in advance (for delivery) or on collection. Cash, Credit & Debit cards, electronic funds transfer & cheques are accepted. For cheque payments goods will only ship when payment has cleared our bank account (allow 3 working days).
8. **Credit Facilities:** Are offered at our discretion and we reserve the right to refuse credit.
9. **Credit Terms:** Where credit has been offered it is on strictly 30-day payment from invoice date terms. We reserve the right to charge interest at the rate of 2% per month on accounts not paid by the due date.
10. **Conditions of Sale:** Goods remain the property of Beechill Bulbs Ltd until payment in full has been received. All sales are final, and goods are sold on a non-return basis. Return shipments without prior written authorisation will not be accepted.
11. **Order Changes:** These can be accepted up to one week before delivery. For items not in stock it can take up to an additional two to four weeks before the order is ready to ship.
12. **Quality:** It is your responsibility to check your goods **immediately** upon receipt. Bulbs must be **UNBOXED** and stored in a **well-ventilated cool and dry place** (bulbs must NOT be allowed to get wet). All orders are checked for quality and accuracy before shipping. Planting should occur as soon as possible after receiving bulbs.
13. **Claims:** Must be made within 5 working days of receipt of order. The value of the claim can never be more than the invoiced amount for bulbs only (excluding all other surcharges and delivery). Beechill Bulbs Ltd are not responsible for losses arising from improper storage, extended storage, planting methods, soil conditions or other factors beyond our control once the stock has left our warehouse.
14. **Disclaimer:** Beechill Bulbs Ltd is not responsible for non-performance or loss of bulbs because of improper storage, planted too deep or too shallow, under or over-watering or otherwise injured from use of pesticide or fertilizer or any growing conditions beyond our control.
15. **Availability:** The products listed are offered subject to availability. Beechill Bulbs Ltd shall be under no liability for any failure or delay in performing a contract arising from lack of availability. Beechill Bulbs reserves the right to substitute varieties and products of a similar nature and quality to the unavailable products.
16. **Varieties:** While we strive to always provide true varieties, any non-true varieties must be communicated to us as soon as they are identified in the growing season. Beechill Bulbs Ltd reserves the right to substitute varieties with similar or better varieties where there is a problem with supply of a certain variety. The products listed on this website are offered subject to availability. Beechill Bulbs Ltd shall be under no liability for any failure or delay in performing a contract arising from lack of availability.
17. **Applicable Law:** These terms and conditions and any agreement to purchase bulbs from Beechill Bulbs Ltd shall be governed by and construed in accordance with Irish law.
